CONTROL PANEL

OPERATING INSTRUCTIONS FOR USE

STANDBY BUTTON: Press to turn ON/OFF the dehumidifier.

HUMIDITY SETTING: Set the desired relative humidity level between 30%-80% during normal dehumidification mode. The '%' indicator light will flash when changes are being made. The dehumidifier will turn off when the room reaches this target RH%

To see the current room temperature press and hold HUMIDITY SETTING button for 5 seconds until the temperature indicator light is on.

DEHUMIDIFY MODE: Select between Normal, Continuous, High-power and Dryer Modes

Normal Mode: Allows manual setting of both fan speed and desired humidity level.

Continuous Mode: Automatically sets the fan to low speed and the dehumidifier will run continuously. Set humidity level is disabled.

High-Power Mode: Automatically sets the fan to high speed and the dehumidifier will run continuously. Set humidity level is disabled.

Dryer Mode: For use when drying clothing and upholstery. The dehumidifier will run continuously. Set humidity level is disabled.

FAN SPEED: Choose between  Low and  High fan speed when in Normal Mode and Fan Mode.

TIMER: Set the Timer to turn the unit on or off, between 1-24 hours.

- Set the Dehumidifier to turn ON: When the dehumidifier is off, press the timer button until you reach the desired number of hours before you want it to turn on.
- Set the dehumidifier to turn OFF: When the dehumidifier is on, press the timer button until you reach the desired number of hours before you want it to turn off.

CHILD LOCK: Press and hold the button for 3 seconds to lock all controls. Press and hold the button for 3 seconds to disable the child lock.

FAN: Turns off the dehumidifying function and circulates the air.

SLEEP: Press to turn off the display lights, the unit will continue to work.

DEFROSTING LIGHT: Indicates the unit is defrosting.

- The unit may need defrosting in temperatures less than 23°C, this will happen automatically and last around 5 minutes. Please do not unplug or turn the unit off whilst in defrost.

HUMIDITY INDICATOR LIGHT:

- Red: Humidity level is greater than 70%
- Green: Humidity level is between 50% - 70%
- Blue: Humidity level is less than 50%

REMOVING AND EMPTYING THE WATER TANK

When the Water Tank Full indicator illuminates and the dehumidifier beeps. The unit will automatically stop. Press the STANDBY button before removing the water tank.

1. Gently pull the water tank out from the back of the dehumidifier.
2. Use the handle to lift, tilt and empty the water tank.
3. Once empty, insert the water tank into the correct position.

PLEASE NOTE: Your dehumidifier will not operate when the water tank is full of water or it is not set properly.

CONTINUOUS DRAINING

1. Remove water tank
2. Connect the drain hole with hose.
3. Ensure the water will always drain freely and the tube will remain in place.
4. Ensure the hose end has a suitable drainage outlet (e.g. bucket/drain)
4. Insert the water tank into the correct position.

CAUTION : DO NOT PLACE CONTINUOUS DRAINAGE HOSE OUTSIDE IN TEMPERATURES BELOW 1°C

CLEANING & MAINTENANCE

Cleaning the Filters:

- Remove the back cover from the dehumidifier.

- Remove excess dust by patting lightly or vacuuming with brush.
- If excessively dirty, remove the Carbon Filter. Please wash with the back grid and filter cover with warm soapy water and rinse.

DISPOSAL OF THIS DEVICE

At the end of the product life cycle, you should not throw this machine into the normal household garbage but bring the product to a collection point for the recycling of electrical and electronic equipment.
